Dear Vijayalaxmi,

Congratulations! Your IEEE Pre-University STEM Portal Grant proposal, "**Epoxy Based Solar Panel Making Workshop**" will be awarded the requested funding of **\$2,000** (US). We received an overwhelming number of applications, eighty-three in all, with a wide array of program types all showing great creativity and innovation in STEM outreach and your program rose to the top! Through your efforts, IEEE will be empowering the next generation of technology innovators.

Half of the total funds you've been awarded will be processed in the next few weeks. The remaining funds will be processed upon completion of your STEM program and its submission to the [IEEE Pre-University STEM Portal](#). The funds transfer will be coordinated with your Section Treasurer through the Section's financial account. Please work with the Treasurer to receive the funds for your program expenses. We will be sure to include you in correspondence with the Treasurer.

Our committee and reviewers were so inspired by the enthusiasm and creativity of our IEEE volunteer community, it shows the power of the amazing people in our organization and profession. Congratulations again and we look forward to hearing the results of your program!

Sincerely,
Lorena Garcia, PECC Chair
